22 December 1965

MEMORANDUM FOR:

25X1

SUBJECT : Minutes of 7 December 1965, JIIRG Meeting.

1. Paragraph 3a is a little confused, I believe. The Sub-Panel will prepare a definition of imagery interpretation for consideration by the Review Group. A second question, however, which is not clearly addressed in this paragraph, is the extent to which the R&D Sub-Panel should concern itself with processing. We propose to only look at the development of processing equipment to the extent that that equipment may be useful in the process of analysis, rather than in general duplication for dissemination of imagery.

2. I think this is a rather subtle point; I am not sure the correction is worthwhile. Let me leave this with you.
